SUBJECT INDEX

Bold numbers **266** and **267** refer to Volume numbers, i.e. Parts I and II, respectively

Acetaldehyde,
MPI spectroscopy in the region of the 3p Rydberg state of some cycloketones, **266**, 133
Adamantane,
Long-range deuterium isotope effects in ^{13}C NMR spectra of adamantane and 2-adamantanone, **267**, 389
2-Adamantanone,
Long-range deuterium isotope effects in ^{13}C NMR spectra of adamantane and 2-adamantanone, **267**, 389
Adsorbed heteroaromatic compounds,
Fluorescence spectra of adsorbed heteroaromatic molecules at selective laser excitation, **266**, 417
Aerosil surface,
Low-temperature laser spectroscopy study of adsorbed excited intermolecular complex, **267**, 303
Aliphatic amine carbamates,
Infrared spectra of aliphatic amine carbamates and the solution of the inverse spectroscopic problem. Part II, **266**, 177
Alkaline metal halides,
Asymmetric stretching vibration of CO_2 occluded in halogen salts of alkaline metals, **267**, 365
Alkoxides,
^1H NMR spectra of complexing of B, Al and Li alkoxides in solution, **267**, 415
N-Alkyl-*N*-substituted 2-phenylacetamides,
Conformations in unsymmetrically *N*-*n*-propyl-*N*-substituted 2-phenylacetamides, **266**, 255
Allyl halides,
Some applications of ab initio calculations in molecular spectroscopy, **266**, 59
Alšar ore,
Vibrational spectra of some sulfide minerals from Alšar, **267**, 191
Amide bond,
Cis–trans isomerism of the amide bond in EtO-Ac-L-Ala-L-Glu, **267**, 73
Amides,
Quantum calculations of the electro-optical parameters of haloid ethers, esters, amides and carbamates, **266**, 303
Ammonia compounds,
Dissociative electron attachment to NH_3, NH_2OH, NH_2NH_2 and NH_2CH_3, **266**, 353
Ammonium 4-methyl-benzenesulfonate,
Spectroscopic studies of salts of 4-methyl-benzenesulfonic acid. II. The spectrum of the ammonium ions in ammonium 4-methyl-benzenesulfonate, **267**, 215
Amorphous thin films,
IR and Raman study of $Si_{1-x}C_x$:H amorphous thin films, **267**, 347
Anatase surface,
IR spectroscopic study of H_2O influence on SO_2 adsorption on TiO_2 surface, **267**, 335
Anthracene,
Low-temperature laser spectroscopy study of adsorbed excited intermolecular complex, **267**, 303
Antimony trichloride,
Study of molecular dynamics of antimony trichloride in some complexes with aromatic hydrocarbons, **267**, 247
Aryloxychlorophosphoranes,
Molecular structure of aryloxychlorophosphoranes as studied by NQR spectroscopy, **267**, 395
Atomic polar tensors,
Ab-initio atomic charges from atomic polar tensors, **266**, 223

Benzene,
Second order Raman spectra of benzene and hexadeuterobenzene in the gaseous phase, **266**, 389
Benzoic acid,
Effect of sodium and lanthanides (III) on

the aromatic system of nicotinic, benzoic and salicylic acids, **267**, 255
Biological macromolecules,
Experimental and computer modelling of vibrational spectra of heterogenous complexes of biological macromolecules, **267**, 61
2,6-Bis-(diethylaminomethyl)-phenols,
^{1}H NMR spectra and internal rotation of the OH-group in 2,6-bis-(diethylaminomethyl)-phenols, **267**, 383
Bismuth (III) iodide,
Stacking-fault excitons in layered crystals BiI_3, **267**, 225
Blocked isocyanates,
Characterization of blocked isocyanates, **267**, 129
Boron nitride,
Ion plating deposits of boron nitride, a FT-IR structural characterization, **267**, 359
Surface species on a submicronic boron nitride powder - a starting FT-IR characterization, **267**, 429
2-(Bromomethyl)-2-methyl-1,3-dibromopropane,
Vibrational spectra and conformations of 2-(bromomethyl)-2-methyl-1,3-dibromopropane, **266**, 289
Butanedione-2,3-dihydrazone,
Vibrational spectra, conformational and normal coordinate analyses for polyazapolyene linear chain molecules, **266**, 333
Butanedione-2,3-dioxime,
Vibrational spectra, conformational and normal coordinate analyses for polyazapolyene linear chain molecules, **266**, 333
N-Butylbenzamides,
Hydrogen bonding of *N*-monosubstituted amides. IR and NMR study of *N*-butylbenzamides, **267**, 49

CO_2,
Infrared spectroscopic investigation of the effect of temperature on the ν_3 band shapes of CO_2 and N_2O in some liquid alkanes, **266**, 153
CO_2 occlusion,
Asymmetric stretching vibration of CO_2 occluded in halogen salts of alkaline metals, **267**, 365
Capsorubins,
Modified caroteniods: spectroscopy and conformation of capsorubin and related end group isomers, **266**, 91
Carbamates,
Quantum calculations of the electro-optical parameters of haloid ethers, esters, amides and carbamates, **266**, 303
Catalytic transformations,
Raman spectra of ethane and ethylene adsorbed on surface of catalyst Sm_2O_3/MgO at high temperatures, **267**, 331
CF_2HCl,
The laser wavelength influence on the ^{13}C separation by the IRMPD of CF_2HC1 molecules, **266**, 405
Chlorocarbonyl isocyanate,
FT-Raman spectrum and conformational stability of liquid chlorocarbonyl isocyanate, **266**, 271
Condensed matters,
Two-photon excited luminescence in condensed matters, **266**, 121
Crystal CO_2,
Vibrational relaxation of three-phonon bound states in crystal CO_2, **266**, 165
Cyano-5-phenyltetrazoles,
The dual fluorescence of cyano-5-phenyltetrazoles, **266**, 361
Cyclohexane,
Far infrared studies on solid cyclohexane, **267**, 235
Cycloketones,
MPI spectroscopy in the region of the 3p Rydberg state of some cycloketones, **266**, 133
Cyclopropyl derivatives,
Vibrational analysis of some cyclopropyl derivatives, **266**, 321
Cytosine monohydrate,
Low-frequency vibrational spectra of cytosine monohydrate single crystals, **267**, 67

Diaquatetrachloromanganates,
Infrared spectra of rubidium and cesium diaquatetetrachloromanganates. II. External vibrations of the water molecules, **266**, 211
Diatomic molecules,
Resonance Raman scattering from simple

systems: theory and experiment, **266**, 115
Diethyl quinolylmethylphosphonates,
Spectroscopic studies of hydrogen bonding in biological active palladium complexes with diethyl quinolylmethylphosphonates, **267**, 87
Diethylaniline,
Low-temperature laser spectroscopy study of adsorbed excited intermolecular complex, **267**, 303
1,8-Dihydroxy-2(imidazole-2-ylazo)naphthalene-3,6-disulphonic acid,
Spectrophotometric study of chelating equilibria of 1,8-dihydroxy-2(imidazole-2-ylazo)naphthalene-3,6-disulphonic acid with Pd(II), Cu(II) and Ni(II), **267**, 377
N,*N*′-Disalicyloyl-1,2-ethanediamine,
Electronic spectra and intramolecular hydrogen-bonding of *N*, *N*′-disalicyloyl-1,2-ethanediamine, **266**, 367
Distyrylbenzene,
Luminescence and photoconductivity studies on bonding, mobility and electronic deactivation in submonolayers and thin films of distyrylbenzene, **267**, 297
Disubstituted stilbenes,
^{13}C NMR spectra of some symmetrically 2,2′-disubstituted stilbenes: Conjugational and conformational effects, **267**, 405
Duschinsky effect,
Calculation of Duschinsky effect in phenol, **266**, 235
4,4′-di-*n*-butyloxyazoxybenzene,
Infrared study of the polymorphism of 4,4′-di-*n*-butyloxyazoxybenzene, **267**, 423

Epoxy ester prepolymers,
NMR investigation of non-brominated and brominated epoxy ester prepolymers, **267**, 123
Esters,
Quantum calculations of the electro-optical parameters of haloid ethers, esters, amides and carbamates, **266**, 303
Some applications of ab initio calculations in molecular spectroscopy, **266**, 59
Ethane,
Raman spectra of ethane and ethylene adsorbed on surface of catalyst Sm_2O_3/MgO at high temperatures, **267**, 331
Ethylene,
FT-IR spectra of ethylene molecularly adsorbed on metal oxides, **267**, 315
Raman spectra of ethane and ethylene adsorbed on surface of catalyst Sm_2O_3/MgO at high temperatures, **267**, 331

Fluoropropene,
Conformational stability and structural parameters of 3-fluoropropene and some substituted derivatives, **266**, 277
Freon 22,
Multiphoton absorption spectra of freon-22 molecules, **267**, 269

GaAs crystals,
The change of Raman scattering in GaAs crystals after UV-excimer laser irradiation, **267**, 155
Glasses,
Very low frequency light scattering in glass matrix, **267**, 241
Glycine,
Raman spectroscopic study of H_2O and D_2O water solutions of glycine, **267**, 39
Grafted surfaces,
FT-IR spectroscopy of grafted surfaces: hydroxy- and chloro silanes onto silicon nitride, **267**, 353

Halogenated disubstituted benzophenones,
Normal coordinate analysis of the halogenated disubstituted benzophenones, **266**, 217
Haloid ethers,
Quantum calculations of the electro-optical parameters of haloid ethers, esters, amides and carbamates, **266**, 303
Hexaaqua complexes,
Vibrational spectra of hexaaqua complexes. II. External motions of water molecules in the spectra of $AlCl_3 \cdot 6H_2O$, **267**, 203
Hexafluoropropanol-acceptor systems,
Conformational influence on hydrogen bond, **267**, 21
Hydantoin derivatives,
Substituent effect on C=O stretching vi-

brations in hydantoin derivatives, **266**, 315
Hydrocarbon molecules,
Hyper-Raman intensity calculation of hydrocarbon molecules, **266**, 423
Hydrogen bonding,
Ab initio molecular orbital calculations of the infrared spectra of hydrogen bonded complexes of water, ammonia and hydroxylamine. Part 10. The intermolecular vibrational modes, **266**, 183
Conformational influence on hydrogen bond, **267**, 21
Hydrogen bonding of *N*-monosubstituted amides. IR and NMR study of *N*-butylbenzamides, **267**, 49
Spectroscopic studies of hydrogen bonding in biological active palladium complexes with diethyl quinolylmethylphosphonates, **267**, 87
Vapor phase FTIR study of H-bonded complexes of 2,2,2-trifluoroethanol and its deuterated derivatives, **267**, 33
Vibrations of hydrogen bonds in hydrogendisulfito and hydrogensulfito complexes, **267**, 55
Hydrogensulfito complexes,
Vibrations of hydrogen bonds in hydrogendisulfito and hydrogensulfito complexes, **267**, 55
Hydroquinone,
Vibrational spectra and normal coordinate analysis of phenol and hydroquinone **266**, 339
Hydroxy-diphenyl-[4-chlorophenyl]-methane,
Experimental and theoretical study of molecular H-complexes of ketones with diphenyl-*p*-chlorophenyl carbinol, **267**, 45

Imidazole,
Assignment of normal modes for imidazole on the basis of 3-21G and 4-21G ab initio force fields, **266**, 345
Surface enhanced Raman scattering of imidazole adsorbed onto silver colloidal particles, **267**, 281
Industrial applications,
The industrial value of Fourier transform Raman spectroscopy, **266**, 97
Intercalated crystals,
Phase transitions in spectroscopy of intercalated crystals with van-der-Waals bonds, **267**, 221
Iron group ion clusters,
Electronic structure of iron group ions in superconductor, **266**, 357
Iron (III) protoporphyrin aggregates,
Iron (III) porphyrin aggregates grafted on agarose gel as models of hemoglobin degradation products, **267**, 117
Isomorphous salts,
Parallel study of isomorphous compounds as an aid in locating water librational bands, **267**, 185

Ketones,
Experimental and theoretical study of molecular H-complexes of ketones with diphenyl-*p*-chlorophenyl carbinol, **267**, 45

Layered crystals,
Stacking-fault excitons in layered crystals BiI_3, **267**, 225
Liquid alkanes,
Infrared spectroscopic investigation of the effect of temperature on the ν_3 band shapes of CO_2 and N_2O in some liquid alkanes, **266**, 153

Malononitrile,
Infrared spectroscopy of vibrational excitons and phase transitions in malononitrile at 141 and 260 K, **266**, 147
Metal hexacarbonyls,
Metal hexacarbonyls (O) entrapped in zeolite cages: electrostatic field and intermolecular vibrational interactions, **267**, 141
Metal oxides,
FT-IR spectra of ethylene molecularly adsorbed on metal oxides, **267**, 315
2-Methylpropionyl chloride,
Raman spectra and conformational stability of 2-methylpropionyl chloride, **266**, 265
Micellar-polyelectrolytic solutions,
Study of micellar-polyelectrolytic solutions by method of laser luminescence spectroscopy of molecular probe, **266**, 411
Modified carotenoids,

Modified carotenoids: spectroscopy and conformation of capsorubin and related end group isomers, **266**, 91
Molecular sulfur,
An intra-molecular potential for S_8, **266**, 229
Multilayer polymer structures,
Characterization of multilayer polymer structures by micro-Raman and micro-FTIR spectroscopies, **266**, 205

N_2O,
Infrared spectroscopic investigation of the effect of temperature on the ν_3 band shapes of CO_2 and N_2O in some liquid alkanes, **266**, 153
$NH_4JO_3 \cdot 2HJO_3$ crystal,
A variable temperature Raman and IR study of superionic phase transition in $NH_4JO_3 \cdot 2HJO_3$ crystal, **267**, 169
Nicotinic acid,
Effect of sodium and lanthanides (III) on the aromatic system of nicotinic, benzoic and salicylic acids, **267**, 255
Nitrided high surface alumina,
Characterization of nitrided high surface γ-alumina powders, **267**, 341
Norbornadiene–quadricyclane system,
Possibility of photochemical energy storage in the norbornadiene–quadricyclane system. Part II, **267**, 7
Nucleotide bases,
AM1 calculation of the nucleic acid bases structure and vibrational spectra, **267**, 99

Opaque crystals,
Asymmetry of Raman scattering at the surface of opaque crystals, **267**, 147
Organic dyes,
Structure of excited states and properties of organic dyes, **266**, 53
Orthophosphate compounds,
Description of molecular distortions. VI. Spectra–structure correlations in orthophosphate compounds, **267**, 209
Oxide glass systems,
Raman spectroscopy of oxide glass system $(1-x)(yB_2O_3 \cdot zLi_2O) \cdot xMO$ (MO = CuO, V_2O_5), **267**, 231

Palladium complexes,
Spectroscopic studies of hydrogen bonding in biological active palladium complexes with diethyl quinolylmethylphosphonates, **267**, 87
Peat samples,
Pyrolysis GC/FID/FT-IR, pyrolysis GC/MS, and FT-IR studies of pore water extracts derived from peat samples differing in depositional environments, **267**, 371
Peptide,
Cis–trans isomerism of the amide bond in EtO-Ac-L-Ala-L-Glu, **267**, 73
3-Phenethyl-3-azabicyclo[3.3.1]nonan-9-ol,
Conformational study of α and β epimers of 3-phenethyl-3-azabicyclo[3.3.1] nonan -9-ol, **266**, 259
Phenol,
Vibrational spectra and normal coordinate analysis of phenol and hydroquinone, **266**, 339
α-Phenylpyridylacrylic acids,
Substituent effects on the carbon-13 chemical shifts in α-phenylpyridylacrylic acids, **267**, 411
Phosphatidylcholine hydration,
NMR study of phosphatidylcholine hydration in relation to its state of aggregation in $CDCl_3$, **267**, 399
Phospholipids,
Intermolecular effects on phosphate frequencies in phospholipids—infrared study and ab-initio model calculation, **266**, 9
Piezosemiconductor compounds,
The features of photoacoustic spectra of CdS and GaAs under piezoelectric detection, **267**, 1
Polar diatomic molecules,
Rovibrational line width of polar diatomic molecules diluted in rare gases. Application to HCl in dense Ar, **266**, 295
Polar molecules,
Raman nonlinear susceptibilities of polar molecules, **266**, 429
Polyaza-polyene linear oligomers,
Vibrational spectra, conformational and normal coordinate analyses for polyaza-polyene linear chain molecules, **266**, 333
Polydiacetylene,
Resonance Raman scattering from simple systems: theory and experiment, **266**, 115

Polyene-tetrone-diacetal,
Dual fluorescence of a novel carotenoid-like chromophore, **266**, 159
Polyenes,
Low-frequency in-plane skeletal vibrations of polyene molecules and their amplitudes in the solid state, **266**, 1
Polylysines,
Spectroscopic studies of the effect of pH on the interaction between congo red and amyloid-type proteins, **267**, 113
Polymethine dimers,
Picosecond absorption spectroscopy of polymethine dimers, **266**, 127
Polymorphism,
Infrared study of the polymorphism of 4,4′-di-*n*-butyloxyazoxybenzene, **267**, 423
Polystyrenes,
Spectroscopic investigation of pyrolysis products of some polystyrenes, **267**, 135
Poly(dichlorophosphazene),
Normal coordinate treatment and conformational analysis of a new type of inorganic polymers: poly(dichlorophosphazene), **266**, 327
Pore water extracts,
Pyrolysis GC/FID/FT-IR, pyrolysis GC/MS, and FT-IR studies of pore water extracts derived from peat samples differing in depositional environments, **267**, 371
Previtamin D,
Effect of environment on the conformational equilibrium and photoconversions of previtamin D, **267**, 93
1-Propanol,
The OD stretching vibrational Raman profile of 1-propanol (OD) in the gas phase, **266**, 309
Proteins,
Spectroscopic studies of the effect of pH on the interaction between congo red and amyloid-type proteins, **267**, 113
Pyridine derivatives,
Substituent and pH effects on self-association of pyridine derivatives in aqueous solution. An ultraviolet study, **266**, 373
Pyruvate,
SERS study of the complexes of thiamine derivatives with pyruvate, **267**, 287
Rare gases,
Rovibrational line width of polar diatomic molecules diluted in rare gases. Application to HCl in dense Ar, **266**, 295
Ro-vibronic intensities,
Calculation of ro-vibronic intensities of high-resolution absorption spectra on the base of hamiltonian in the principal axes of inertia, **266**, 241

S_1 anthracene,
The effect of molecular structure on intramolecular anharmonic vibrational mixing and IVR, **266**, 247
S_1 benzene,
The effect of molecular structure on intramolecular anharmonic vibrational mixing and IVR, **266**, 247
Salicylic acid,
Effect of sodium and lanthanides (III) on the aromatic system of nicotinic, benzoic and salicylic acids, **267**, 255
SCANNET,
Integrated expert system SCANNET for storage and retrieval of spectral data in analytical chemistry, **267**, 261
Selective excitation,
High resolution NMR using selective excitation, **266**, 39
Silica surface layer,
Surface photochemistry: the organic charge-transfer complexes on silica, **267**, 309
Silicon films,
Raman scattering in amorphous silicon films, **267**, 177
Raman study of light-induced changes in silicon–hydrogen bond stretching vibration in *a*-Si:H, **267**, 275
Silicon nitride,
FT-IR spectroscopy of grafted surfaces: hydroxy- and chloro silanes onto silicon nitride, **267**, 353
Silver sols,
Surface enhanced Raman scattering of imidazole adsorbed onto silver colloidal particles, **267**, 281
Simple expressions,
Simple results for Raman scattering, **266**, 171
Slater shielding constants,
Spectroscopic analysis of molecular structures by theoretical calculations based upon

Slater's shielding constants, **266**, 379
SO_2 adsorption,
IR spectroscopic study of H_2O influence on SO_2 adsorption on TiO_2 surface, **267**, 335
*N*8-substituted nortropanes,
Synthesis and structural and conformational study of 3α-methoxycarbonyl-3β-(3′,4′,5′-trimethoxybenzamido)-*N*8-substituted nortropanes, **267**, 79
Sulfide minerals,
Vibrational spectra of some sulfide minerals from Alšar, **267**, 191
Superthin films,
Broad-band spectroscopy of surface electromagnetic waves, **266**, 65
Surface electromagnetic waves,
Broad-band spectroscopy of surface electromagnetic waves, **266**, 65
Surface species,
Surface species on a submicronic boron nitride powder—a starting FT-IR characterization, **267**, 429

Tellurium oxyhalide glasses,
Spectroscopic observations of temperature and composition effects on tellurium oxyhalide glasses, **267**, 163
Tetracene·(rare gas)$_1$ heteroclusters,
Intermolecular vibrational excitations of tetracene·(rare gas)$_1$ heteroclusters, **266**, 75
Thiamine derivatives,
SERS study of the complexes of thiamine derivatives with pyruvate, **267**, 287
Thiosaccharinates,
Monohydrates of the thiosaccharinates of sodium and potassium: spectra–structure correlations, **267**, 197
3-α(*p*-Tolylamino)-*N*-phenethylnorgranatane,
Structural study of 3-α(*p*-tolylamino)-*N*-phenethylnorgranatane, **266**, 283
Transient complexes,
Isolation and characterisation of some transient complexes of chemical interest using pulsed-nozzle, Fourier-transform microwave spectroscopy, **266**, 21
Transition matrix elements,
Comparison of the coefficients of the transition matrix elements calculated by approximation methods and Morse-potential wavefunctions, **266**, 141
222-Trifluoroethanol,
Vapor phase FTIR study of H-bonded complexes of 2,2,2-trifluoroethanol and its deuterated derivatives, **267**, 33
Triphonons,
Vibrational relaxation of three-phonon bound states in crystal CO_2, **266**, 165

Uroporphyrins,
Hole-burning spectroscopy of uroporphyrins, **267**, 105

Xenon chloride,
Mechanism of the two-photon laser assisted reaction of Xe and Cl_2 to form XeCl, **267**, 13
